

# The Museum of possibilities

## A living waters Hub

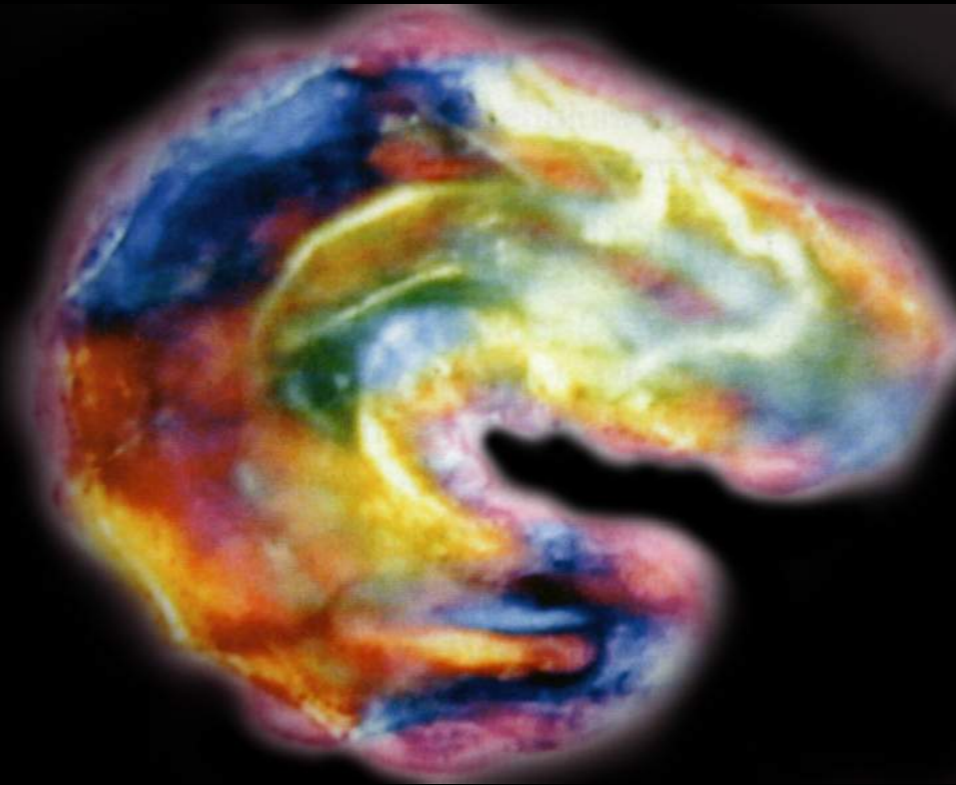

- No site to maintain and free access
- Teaches — provides information and successful
- Processes of engagement with water
- Taking care of our waters
- place of scientific knowledge
- Possibilities
- Mentors
- inspire and reach large numbers

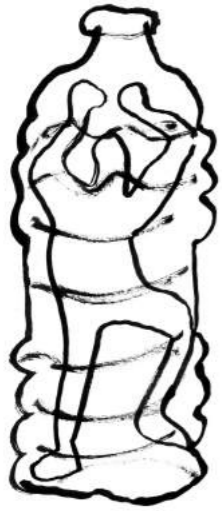

- water has dynamic responsive form
- water has memory
- water has consciousness
- water is the medium of life

# The Rainbow and the Worm

Mae Wan Ho, Biophysicist

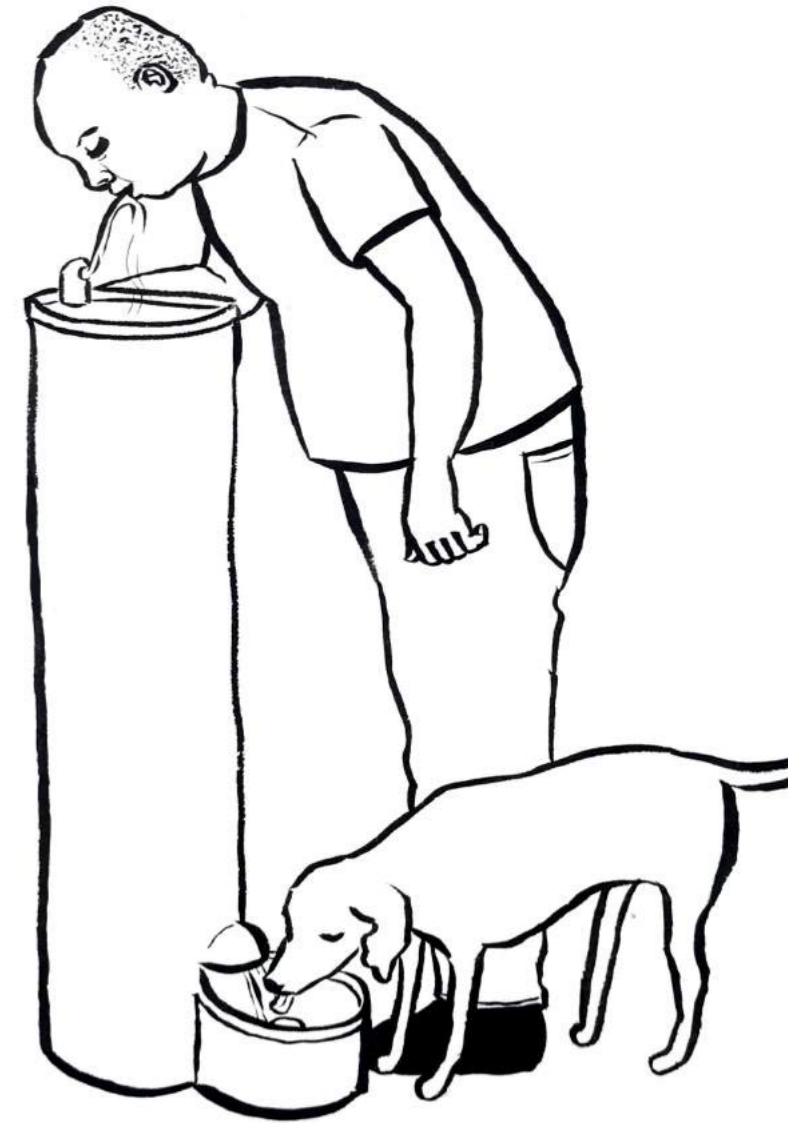

- every new life form has a complete rainbow

# Bottling water?

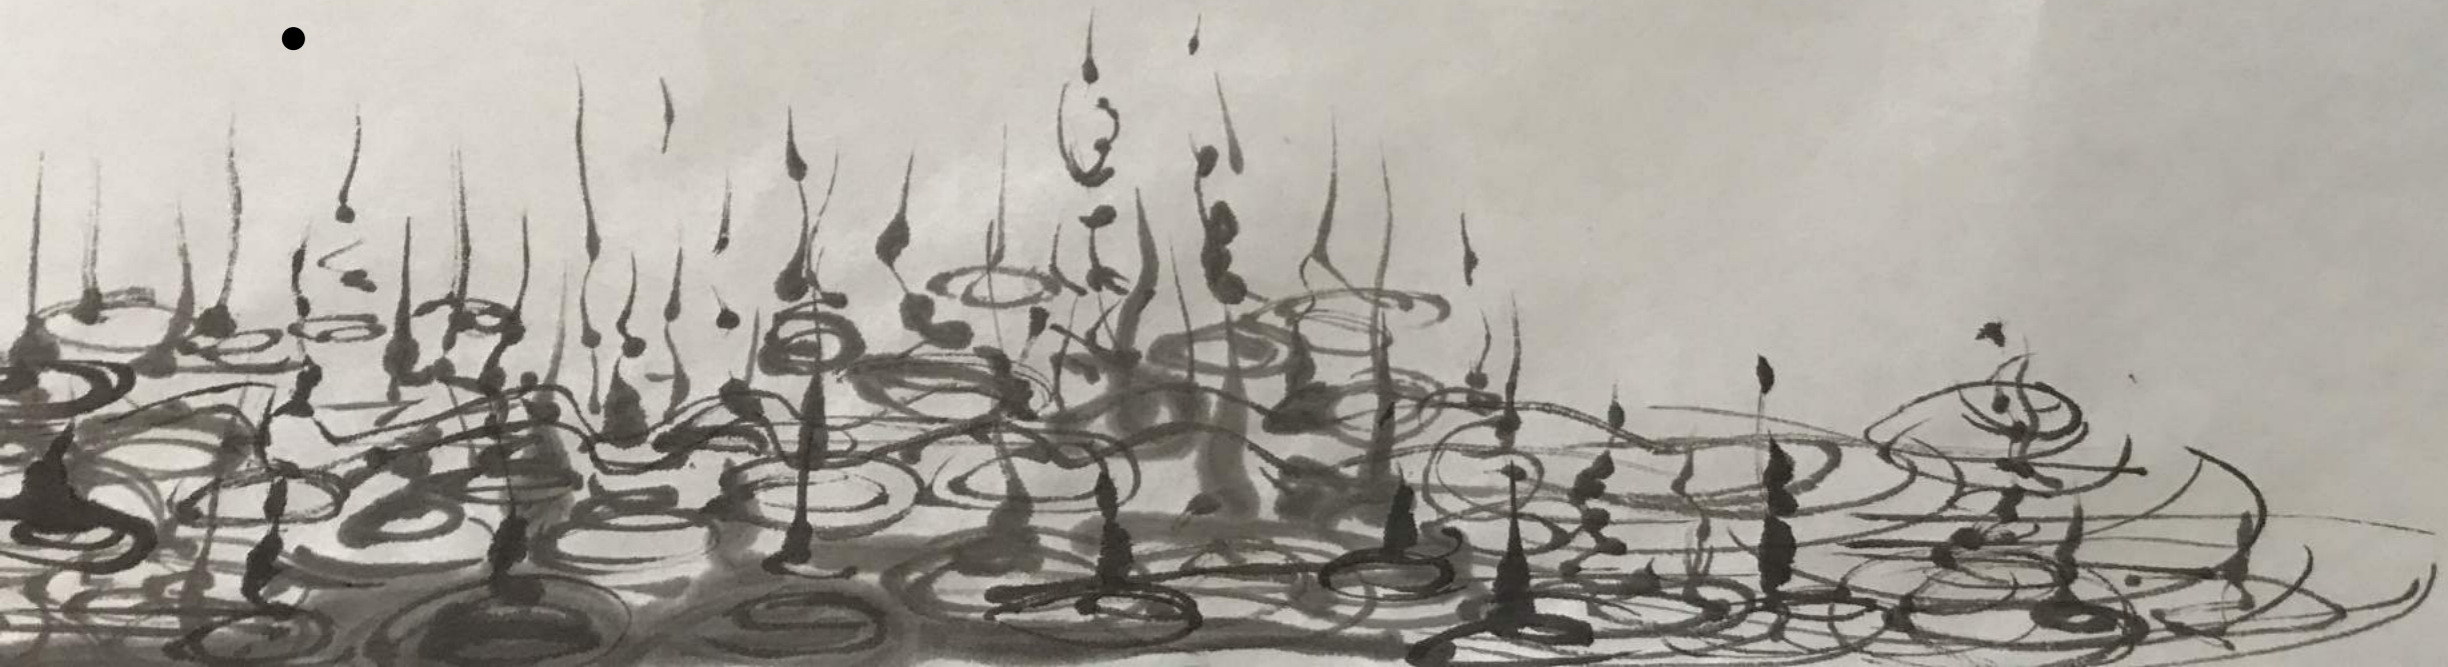

- Only 1 in 5 plastic bottles are recycled
- It requires 3x the amount of water to produce plastic bottle as it does to fill it
- Bottled water costs over 1,000+ times more than tap water

- 
- With the publication of People's Water — keepers is initiating the living water collaborative, to preserve and restore water quality for the public good.
  - This initiative includes the human right to water, Less than that is genocide.

We need a world policy on water, Water knows no boundaries and the world's water supplies need to be available to all and not part of a corporate policy to own

- 

# Imagine a world without this

# Living Water Garden Chengdu, China 1998
